Mistral AI : réponse au besoin de "confiance" et de solutions On Prem. ?

Réunion Générale - 3ème édition

Mistral AI : réponse au besoin de "confiance" et de solutions On Prem. ? .

Han HELOIR : EMEA Solutions Architect

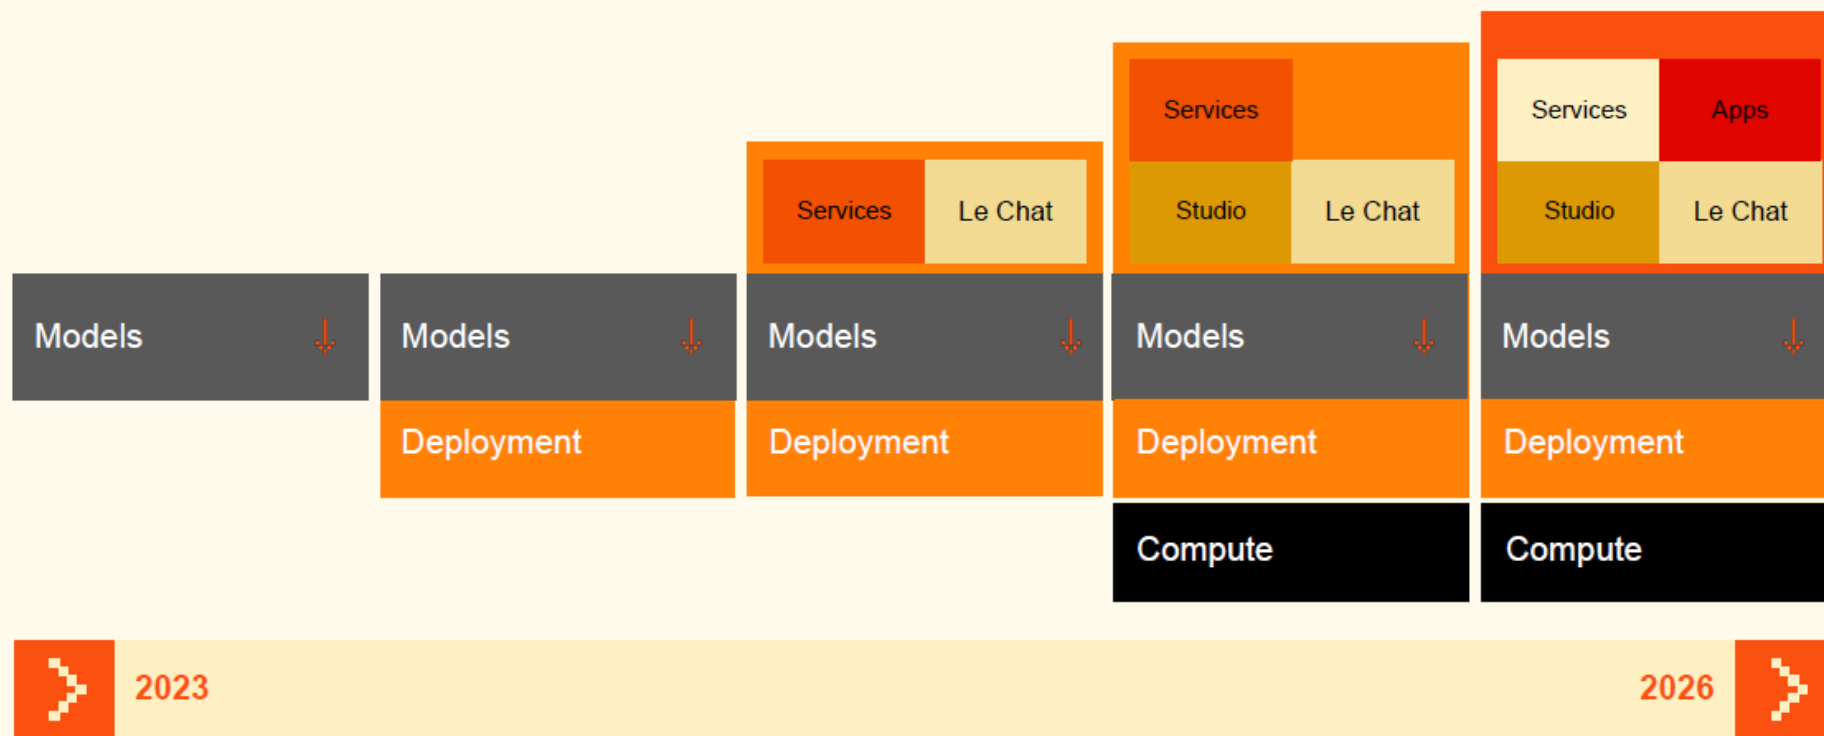

Mistral AI: Une solution de
confiance?
on premises?

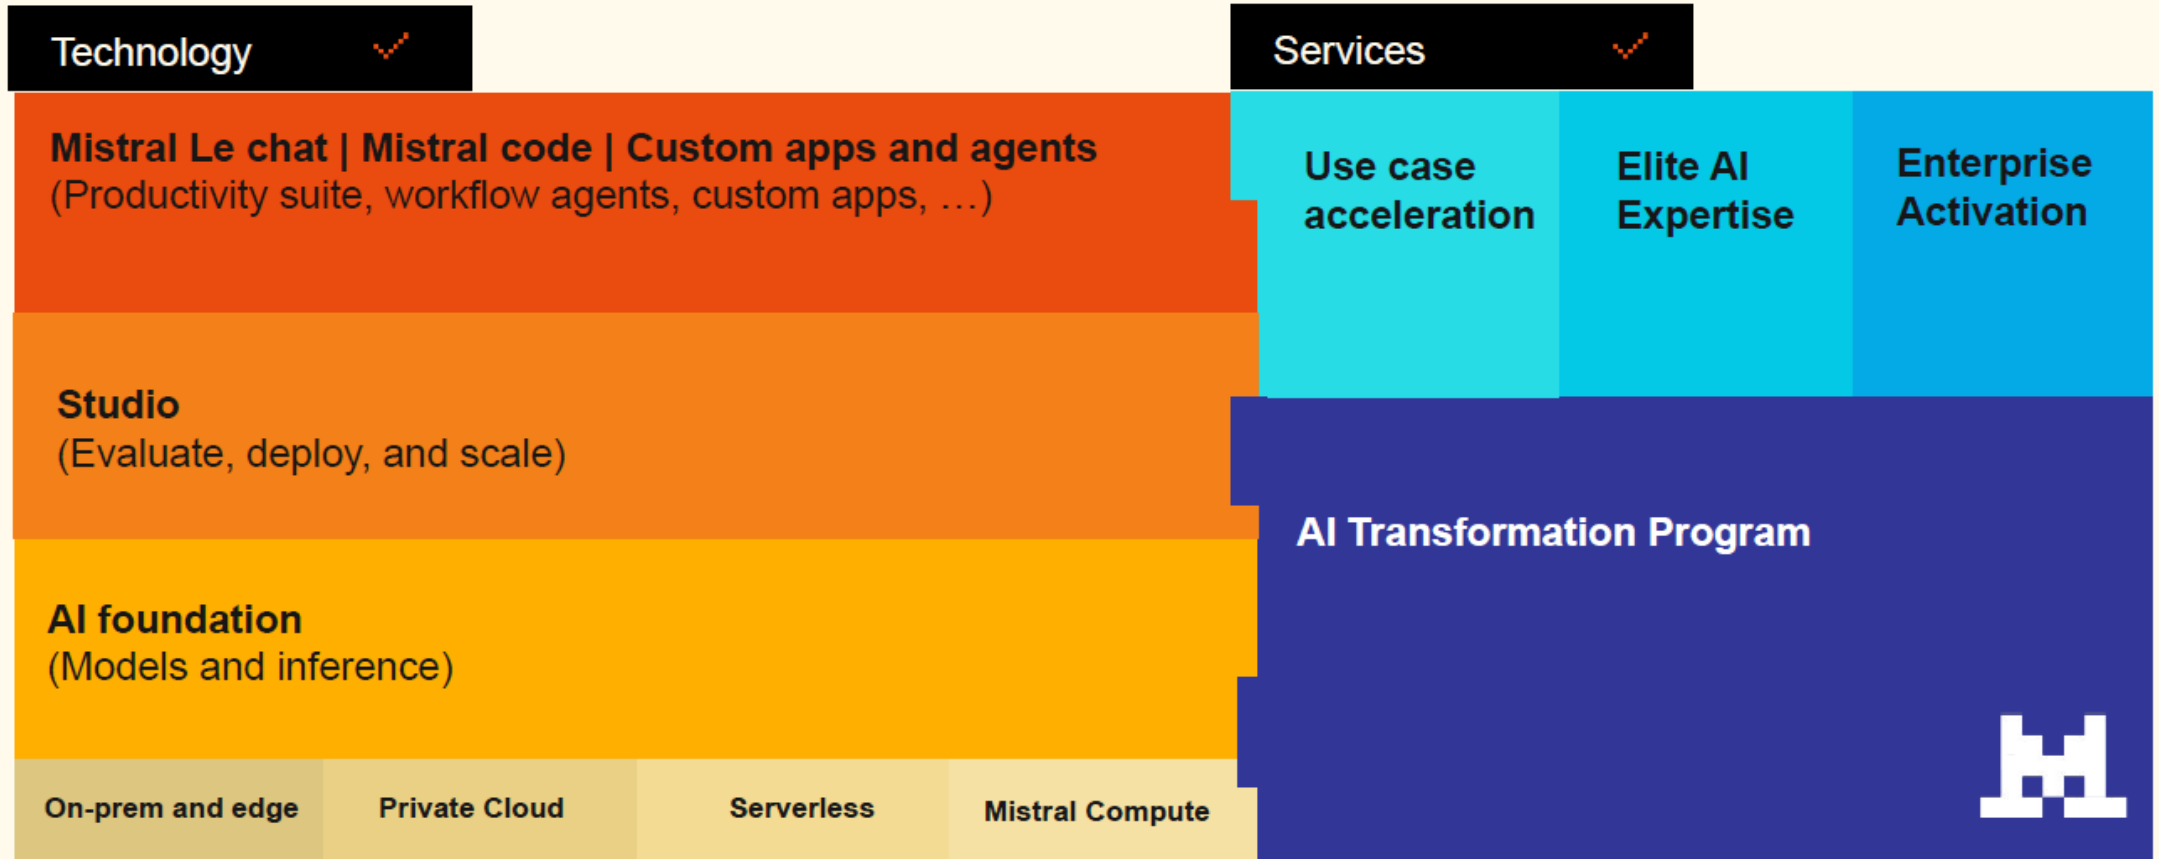

One mission. Frontier AI. In everyone's hands.

Enabling AI transformation with

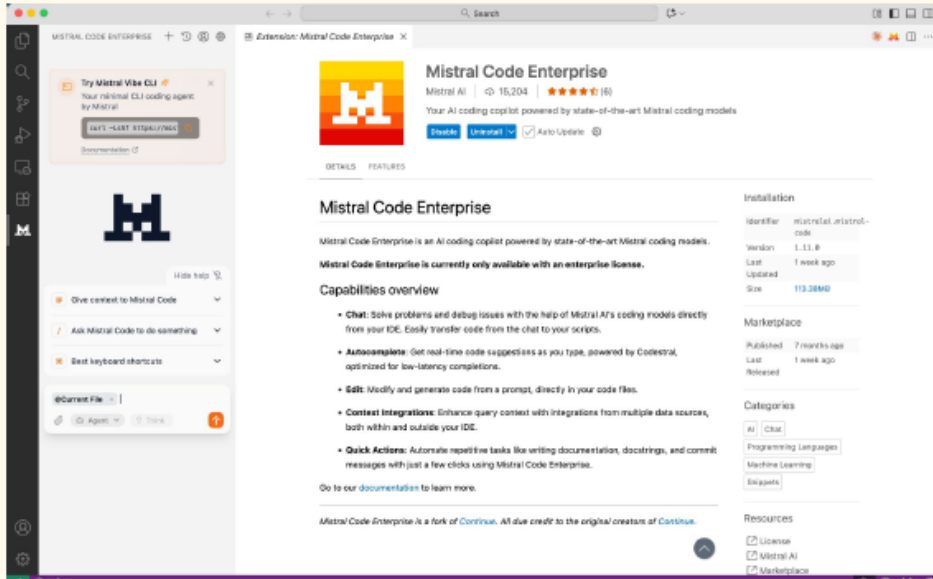

- ✓ Enterprise-grade AI solutions
- ✓ Frontier AI lab

The Mistral AI enterprise suite

Mistral Code Value Proposition

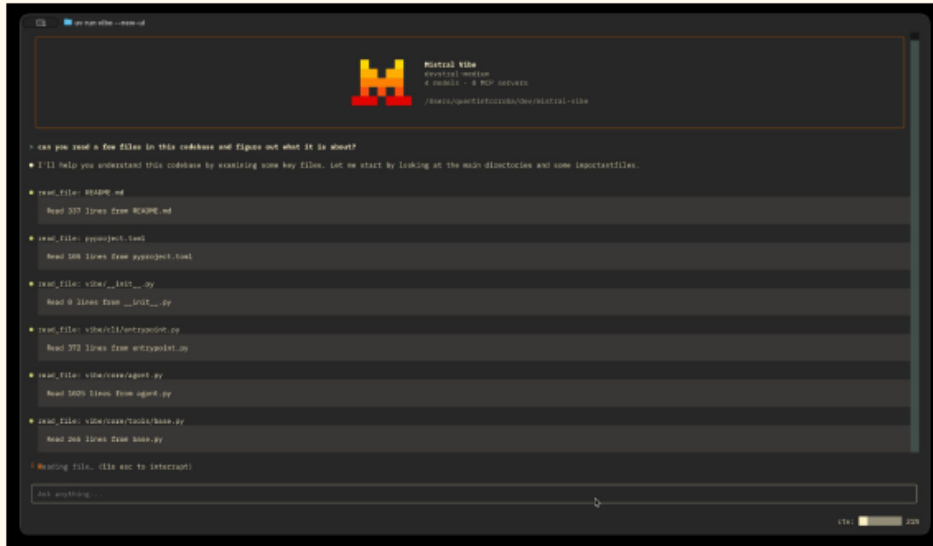

Control Deploy on-premises or in your cloud with open-weight models

Cost Efficiency Superior price-performance ratio across model tiers

Flexibility Run locally for air-gapped environments, on-premises or via API

Enterprise Customization Fine-tune models on your proprietary codebase

Introducing Devstral 2

State-of-the-art open model for code agents

Devstral 2

Deep code understanding at scale

Full agentic reasoning across large codebases

256k context enables architecture-level awareness

Efficient problem-solving with unmatched cost-performance

Stretch tokens dramatically farther while maintaining **precision and speed**

• SWE-Bench Verified: Open-weight vs Proprietary models

Introducing Devstral 2

State-of-the-art open model for code agents

Deep code understanding at scale

Full agentic reasoning across large codebases

256k context enables architecture-level awareness

Efficient problem-solving with unmatched cost-performance

Stretch tokens dramatically farther while maintaining **precision and speed**

Deployment Editions Recap

	Mistral Serverless	Mistral Serverless Dedicated	Self-Hosted (VPC/ on-prem)
Who is it for	Organizations that seek maximum flexibility & cost efficiency. Mainly for pre-sales demos.	Organizations that seek privacy but still some level of flexibility / cost-efficiency, while having access to production SLAs.	Organizations with strictest security requirements
Infrastructure	Owned & Managed by Mistral	Owned & Managed by Mistral	Owned & Managed by client
Data Access & Storage	Shared data plane, multi-tenant storage	Virtually isolated per client	Hosted by client
Network	Public Internet	Private subnet	Hosted by client
Inference Compute	Shared	Shared <i>(Customer can subscribe to dedicated GPU options)</i>	Hosted by client
